

AIR CONVEYOR

POSIJET

with air cushion system

Air conveyor for empty packaging materials such as food and cigarette cartons, boxes and plastic trays, etc...

This system conveys and accumulates these items with minimal line pressure at high speed.

POSIMAT 

ADVANTAGES

Low cost, minimal maintenance and no product damage (in comparison to traditional conveying systems).

Unique flexibility / high speeds.

Quick feeding batching system for product groups to be conveyed from one to several lanes.

It can handle inclines and declines in limited spaces.

SPECIFICATIONS

Product sizes: from 60 x 30 x 100 mm. up to 200 x 150 x 400 mm trays and boxes. * We can study customized requirements.

Product material: all types of plastic (PET, PP, HDPE, polystyrene, etc...), carton board, aluminium, etc...

Items travel on a specially designed blow profile plate and are propelled by high volume low pressure ambient air. The air velocity is provided by one or more centrifugal fans controlled electrically through VFD's and PLC to produce the specific velocity and pressure required at each section of the system. The air coming through the patterns flows in the same sense as the transport does.
