

# UNSCRAMBLERS

FOR EMPTY PLASTIC PHARMACEUTICAL CONTAINERS

POSIMAT'S 40 years of experience in empty container handling systems is now dedicated to the pharmaceutical industry.

Main features of POSIMAT unscrambling systems:

- High **efficiency rotary feeding** systems.
- **Small footprint** equipment.
- **No pressurized air** needed.
- Parts can be **sanitized and/or sterilized**.
- **Changeover repeatability** guaranteed.
- **Low maintenance**.
- **Easy operation** for non-skilled teams.
- Customer's **URS adapted**.

## MICRO ASEPTIC

- All the advantages of the rotary unscramblers **adapted to the pharma industry requirements.**
- **No use of pressurized air.**
- All contacts parts with the bottle (included main bowl) can be **sanitized and/or sterilized.**
- High efficiency, low maintenance, **easy operation by non-skilled operators.**
- **Change of format is plug & play** with no need of further manual adjustments.
- **Repeatability of change of formats guaranteed.**

## ASEPTIC

- Specially conceived for the pharma industry for **small plastic bottles and other containers that require maximum clean handling.**
- Manufactured according to highest **GMP standards** and materials (POM, PEEK, and SS 316L).
- Specially conceived to work in clean areas with laminar flow. Fully open and accessible. All contacts parts with the bottle (included main bowl) can be **sanitized and/or sterilized.**
- **Frames and enclosures adapted to the customer's design.**
- **Change of format is plug & play** with no need of further manual adjustments.

## POSIPHARMA

- Specially **conceived to feed jars** to the line for those laboratories with **less hygienic requirements.**
- Uses compressed air, **filtered according to Customer needs.**
- Easy change-over, high efficiency equipment, fully automatic, **for non-skilled operators.**
- **Repeatability of change of formats guaranteed.**
